

Green School Initiative

Using the Plan, you created how can you design a chart to track what we are doing now and track the results of the changes you want to make.

A. Recycling-create a chart to show what we are recycling now, and how we can track the changes you want to make.

a. If you were to design an experiment to see how paper our receptacle could hold how would you do it?

B. Energy usage-create a chart to show what we are recycling now, and how we can track the changes you want to make.

a. If we wanted to see how much power, we were using just for lights how would you do that? How could we come up with an idea as to how much money we could save by making one of your changes?

c. Habitat Construction-create a chart to show what we are recycling now, and how we can track the changes you want to make.

a. How could we check for diversity now? How would you measure the change?
